DURABLE & STABLE QUALITY

Such type of material is available in the market in many variants and qualities ranging from high to low cost. We provide the optimum quality required for perfect applications at a perfectly reasonable price, giving our customers an overall pleasant experience.

1. We provide the widest range of mouldings and textures. Ten different varieties of mouldings and all available in ten different textures.
2. The top surface of our sheets is made by coextruding a special material layer (better than the base material), and over that we put the required texture. This not only gives out a better colour quality, but also a more consistent and smooth surface finish.
3. Colour texture quality and surface coating quality are both of optimum level of quality, giving a lasting life to the product.
4. Material has sufficient level of elasticity in order to keep the level of damage minimum during fabrication and transportation.

QUALITY COMPARISON

OTHER MATERIAL QUALITY

Coating peeling
off very easily,
exposing the
colour layer,
easy to get
damage.

PLASTONE QUALITY

Proper coating
and colour
layer, scratch
resistant and
long lasting.

PLASTONE
WALL CLADDINGS
